

Process Portfolio

Batch and Integrated batch

CaptureSMB

MCSGP

N-Rich

Run two chromatographic steps without a stop

In-line dilution

Two polishing steps or capture and polish

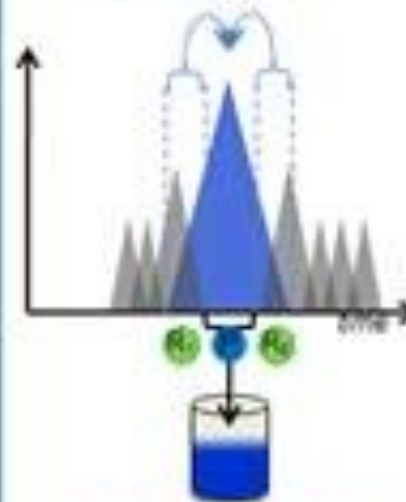

High throughput automated purification for discovery

Have the full loading capacity of your column

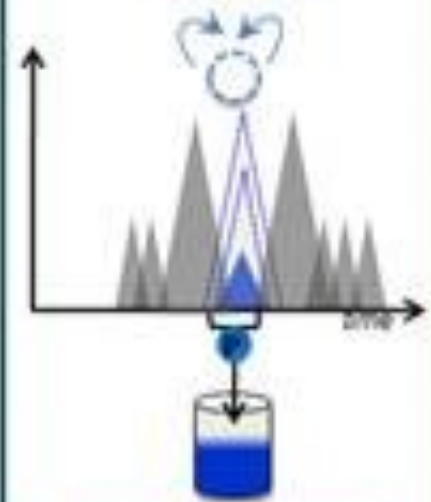

40% Protein A cost savings
2 x faster processing

Recycle impure product, extract pure product

Recycle until it's pure!
more pure product

Cyclic enrichment before gradient elution

Recycle to enrich product and deplete side fractions
