

Protein Refolding in 1 Hour

- > **Fractional Factorial Matrix Design**
- > **Single-Step Screening Technique**
- > **15 Pre-Made Buffer Solutions**
- > **Easy-to-Use Instructions**

Athena's QuickFold™ Protein Refolding Kit uses a fractional factorial matrix design with 15 ready-to-use buffers to help you easily identify the best way to refold your protein. Our kit can successfully refold your protein into its native structure in as little as an hour, letting you spend more time on your research and less time waiting for results.
